

1. **Berechne schrittweise (vergiss nicht zu kürzen) :**

$\frac{1}{3} + \frac{1}{2} =$	$1 - \frac{2}{5} =$	$\frac{2}{3} \cdot \frac{1}{2} =$	$\frac{3}{4} : 2 =$
.....	.....	.....	.....
$\frac{1}{4} + \frac{1}{2} =$	$\frac{2}{3} - \frac{1}{6} =$	$5 \cdot \frac{3}{5} =$	$\frac{1}{2} : 3 =$
.....	.....	.....	.....
$\frac{1}{2} + \frac{3}{4} =$	$\frac{2}{3} - \frac{1}{2} =$	$\frac{3}{4} \cdot \frac{1}{2} =$	$\frac{4}{3} : 2 =$
.....	.....	.....	.....
$\frac{1}{4} + \frac{3}{8} =$	$\frac{1}{3} - \frac{1}{4} =$	$\frac{1}{8} \cdot \frac{1}{3} =$	$\frac{2}{3} : 3 =$
.....	.....	.....	.....

2. **Berechne in diesen Zahlenmauern die fehlenden Brüche :**

3. **Berechne in dieser Tabelle die fehlenden Zahlen :**

		$\frac{1}{5}$	$\frac{1}{3}$	$\frac{2}{3}$	$\frac{3}{4}$
+					
$\frac{1}{4}$					
$\frac{1}{3}$					
$\frac{1}{2}$					
$\frac{2}{3}$					

4. **Berechne in dieser Tabelle die fehlenden Zahlen :**

		4	$\frac{1}{3}$	$\frac{3}{5}$	$\frac{7}{10}$	$\frac{5}{12}$
■						
■						
5	$\frac{4}{5}$					
$\frac{2}{3}$						
$\frac{3}{10}$						
$\frac{5}{6}$						
$\frac{3}{8}$
