

Multiplikation von gemeinen Brüchen ('Rechteckmodell')

$$\frac{3}{5} \times \frac{3}{4} = ?$$

$$\frac{3}{5} \cdot \frac{3}{4} = \frac{9}{20}$$

The diagram shows the multiplication of two fractions. The first fraction is 3/5, with the numerator 3 in a yellow circle and the denominator 5 in a red circle. The second fraction is 3/4, with the numerator 3 in a yellow circle and the denominator 4 in a red circle. The result is 9/20, with the numerator 9 in a yellow circle and the denominator 20 in a red circle. Brackets and dots indicate the multiplication of the numerators (3 * 3 = 9) and the denominators (5 * 4 = 20).
